

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green color. They are positioned diagonally, with the blue one in front of the green one.

# Crypto-Cows NFT and Startup creation

Unleashing the power of Crypto-Cows NFT

# Problem Statement

Addressing Limitations and Unlocking Opportunities

# Problem Statement

## **Problem:**

Lack of access to DE-FI features for NFT holders and limited collaboration among NFT projects.

## **Opportunity:**

Crypto-Cows NFT aims to provide exclusive DE-FI features for NFT holders and establish a network of collaborating NFT projects.

# Our Vision

Shaping the Future of NFTs and DE-FI

# Vision

Become a leading NFT brand that empowers NFT holders with DE-FI features and collaboration among NFT projects.

# Project Overview

Building a Network of Collaborating NFT Projects

# Project Overview

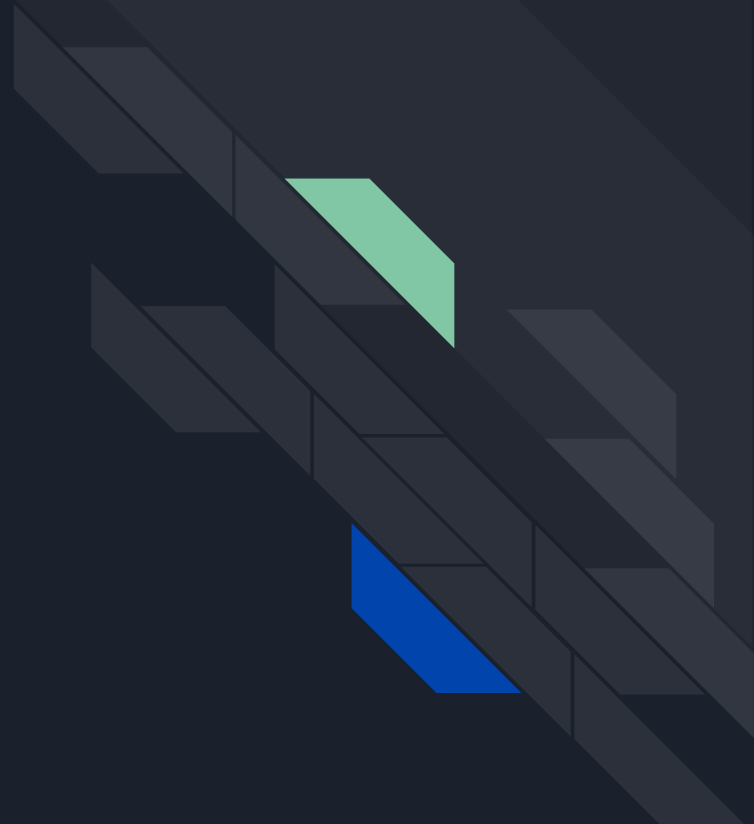

**Crypto-Cows NFT:** An NFT project created in September 2021 with a belief in the potential of blockchain as an unstoppable, incensurable, and decentralized system.

## Goals:

- Establish a strong NFT brand with exclusive DE-FI features for holders.
- Create a network of collaborating NFT projects.
- Collaboration: Crypto-Cows has initiated collaboration with Pixtalgia, an upcoming NFT project, to kickstart the network of collaborating projects.
- Development progress: Ongoing development of project features while generating sales from NFT collections.

# Project Features

Enhancing the Crypto-Cows NFT Experience

# Project Features

- Ranch: A platform where holders can view their Crypto-Cows NFTs, interact with them, and access key information.
- Milking: NFT staking for Crypto-Cows to earn Crypto-Cows Milk (CCM) tokens, providing exclusive earning opportunities for holders.
- NFT Launchpad: A platform for launching new NFT projects, offering whitelist spots or a percentage of the total supply as prizes.
- NFT Breeding: Staking two Crypto-Cows NFTs to breed and receive new NFTs, incentivizing scarcity and value creation.

# Polygon Network

Powered by the Polygon Ecosystem

# Polygon Network

Choice of Polygon Network: Solid Ethereum layer 2, low-cost transactions and accessibility for DE-FI services.

Cooperation: While built on the Polygon Network, Crypto-Cows aims to **collaborate** with projects on **various blockchain** networks.

# Token Utility

Empowering the Crypto-Cows Community

# Token Utility

Crypto-Cows Milk (CCM) is the utility token of the Crypto-Cows NFT project.

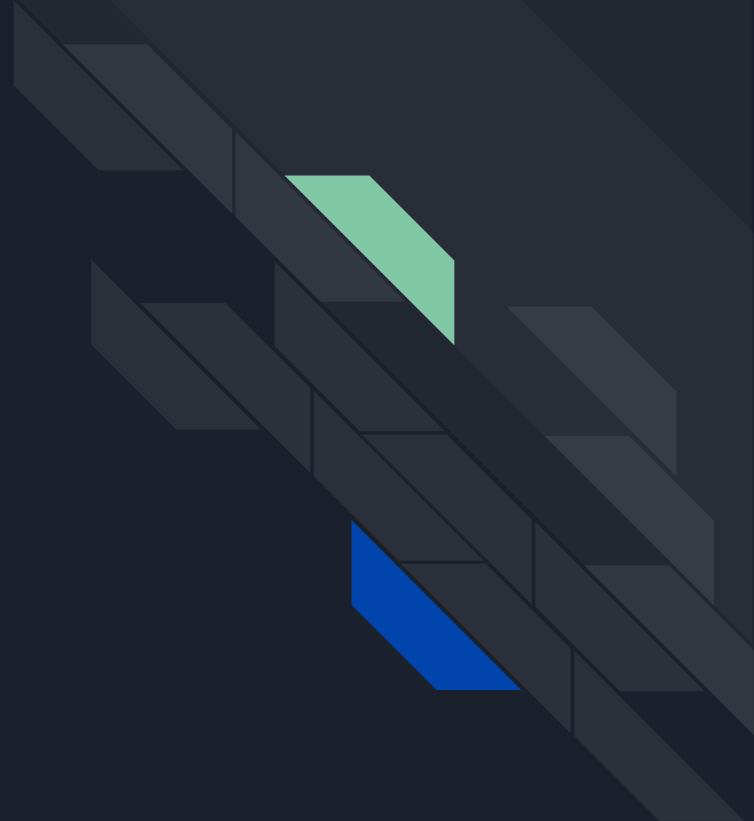

**Governance:** Token holders can participate in decision-making processes, including determining parameters for new NFT collections.

**NFT Launchpad:** Participation in the launchpad using CCM or Crypto-Cows NFTs as a means of access.

**Tokenomics:** Details regarding token distribution, supply allocation, and incentives will be provided in future updates, but the idea is to emit the majority of the token supply by rewards for staking the Crypto-Cows NFTs.

# The Startup

Revolutionizing Blockchain Development

# The Startup

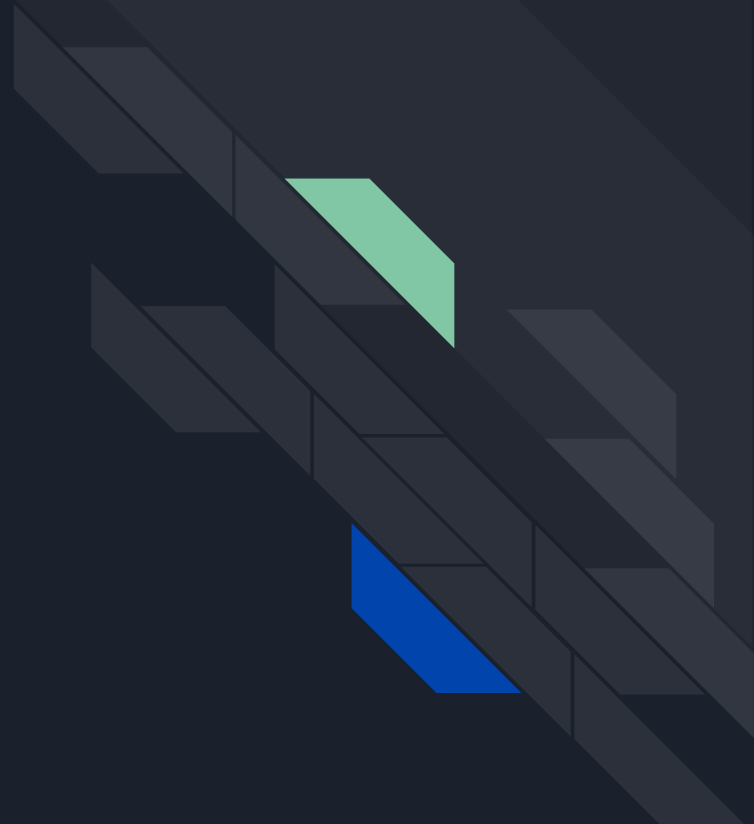

Name to be revealed at the moment of creation.

**Core Business:** Blockchain development, consulting services, and scaling to a comprehensive blockchain company.

**Funding Allocation:** Funds will be allocated to empower the development team, marketing initiatives, social media presence, and acquiring clients.

# Scaling to a 360-Degree Blockchain Company

Expanding Horizons and Driving Innovation

# Scaling to a 360-Degree Blockchain Company

Scale the startup to become a comprehensive blockchain company, covering various sectors within the blockchain industry.

# Services

- **Blockchain consulting:** Assisting individuals and companies with the transition to blockchain technology.
- **NFT project creation consulting:** Sharing our expertise in NFT and DE-FI to guide others in creating their own successful projects.
- **Mining with clean energy:** Building and expanding a solar-powered mining farm, promoting decentralization with a sustainable approach.
- **PoS network validation:** Establishing validator machines for Proof of Stake networks and incentivizing participation with NFT rewards.
- **Game-Fi projects:** Developing our own Play-to-Earn project and offering consulting services for other Game-Fi initiatives.
- **Software Products:** Building software products as a software house, including a finance app for **managing portfolios** and a system for selling **software licenses** as NFTs.
- **Team Expansion:** Teams will be expanded and empowered as the company grows.

A blue parallelogram and a light green parallelogram are positioned in the top-left corner of the slide.
